

SimUnity®

Administration and management of
your flight training center made easy!

Advantages at a glance

SimUnity® is your **complete software solution for operators of flight and cabin simulators**. The software design is robust and modular to assure a 24/7 operation.

SimUnity® offers **modules for administration, controlling, scheduling, tracking and reporting**. It improves the efficiency of your company by maximizing equipment uptime and keeping assets in peak operating condition.

SimUnity® increases the reliability **of your resources significantly**. Your equipment suffers fewer malfunctions; preventive maintenance inspections can spot potential dangers before they actually cause trouble.

SimUnity® **reduces operational and maintenance costs**. Work efficiency is achieved through better scheduling of maintenance staff. You gain significant savings by preventing expensive repairs before they occur and improving the efficiency of routine maintenance tasks.

SimUnity® includes a spare part management, tracking and valuation tool which **reduces the amount of in stock spare parts**. Track your spare parts and get notified if the delivery is overdue.

SimUnity® **generates advanced reports** on the availability and reliability of your resources. Keep an eye on what's going on and react promptly to new trends.

SimUnity® provides detailed **task tracking to enhance your quality management system** and supporting aeronautical authorities like FAA, LBA for technical acceptance.

SimUnity® improves the transparency of all tasks and is easy to customize for special needs and **can be operated on PC and via terminal client**.

SimUnity® **simplifies your workflow**. Many typical processes are implemented through combined actions.

SimUnity® includes an **intelligent user rights management**. The system administration is completely straight forward to set up users, groups and grant access to program modules/features.

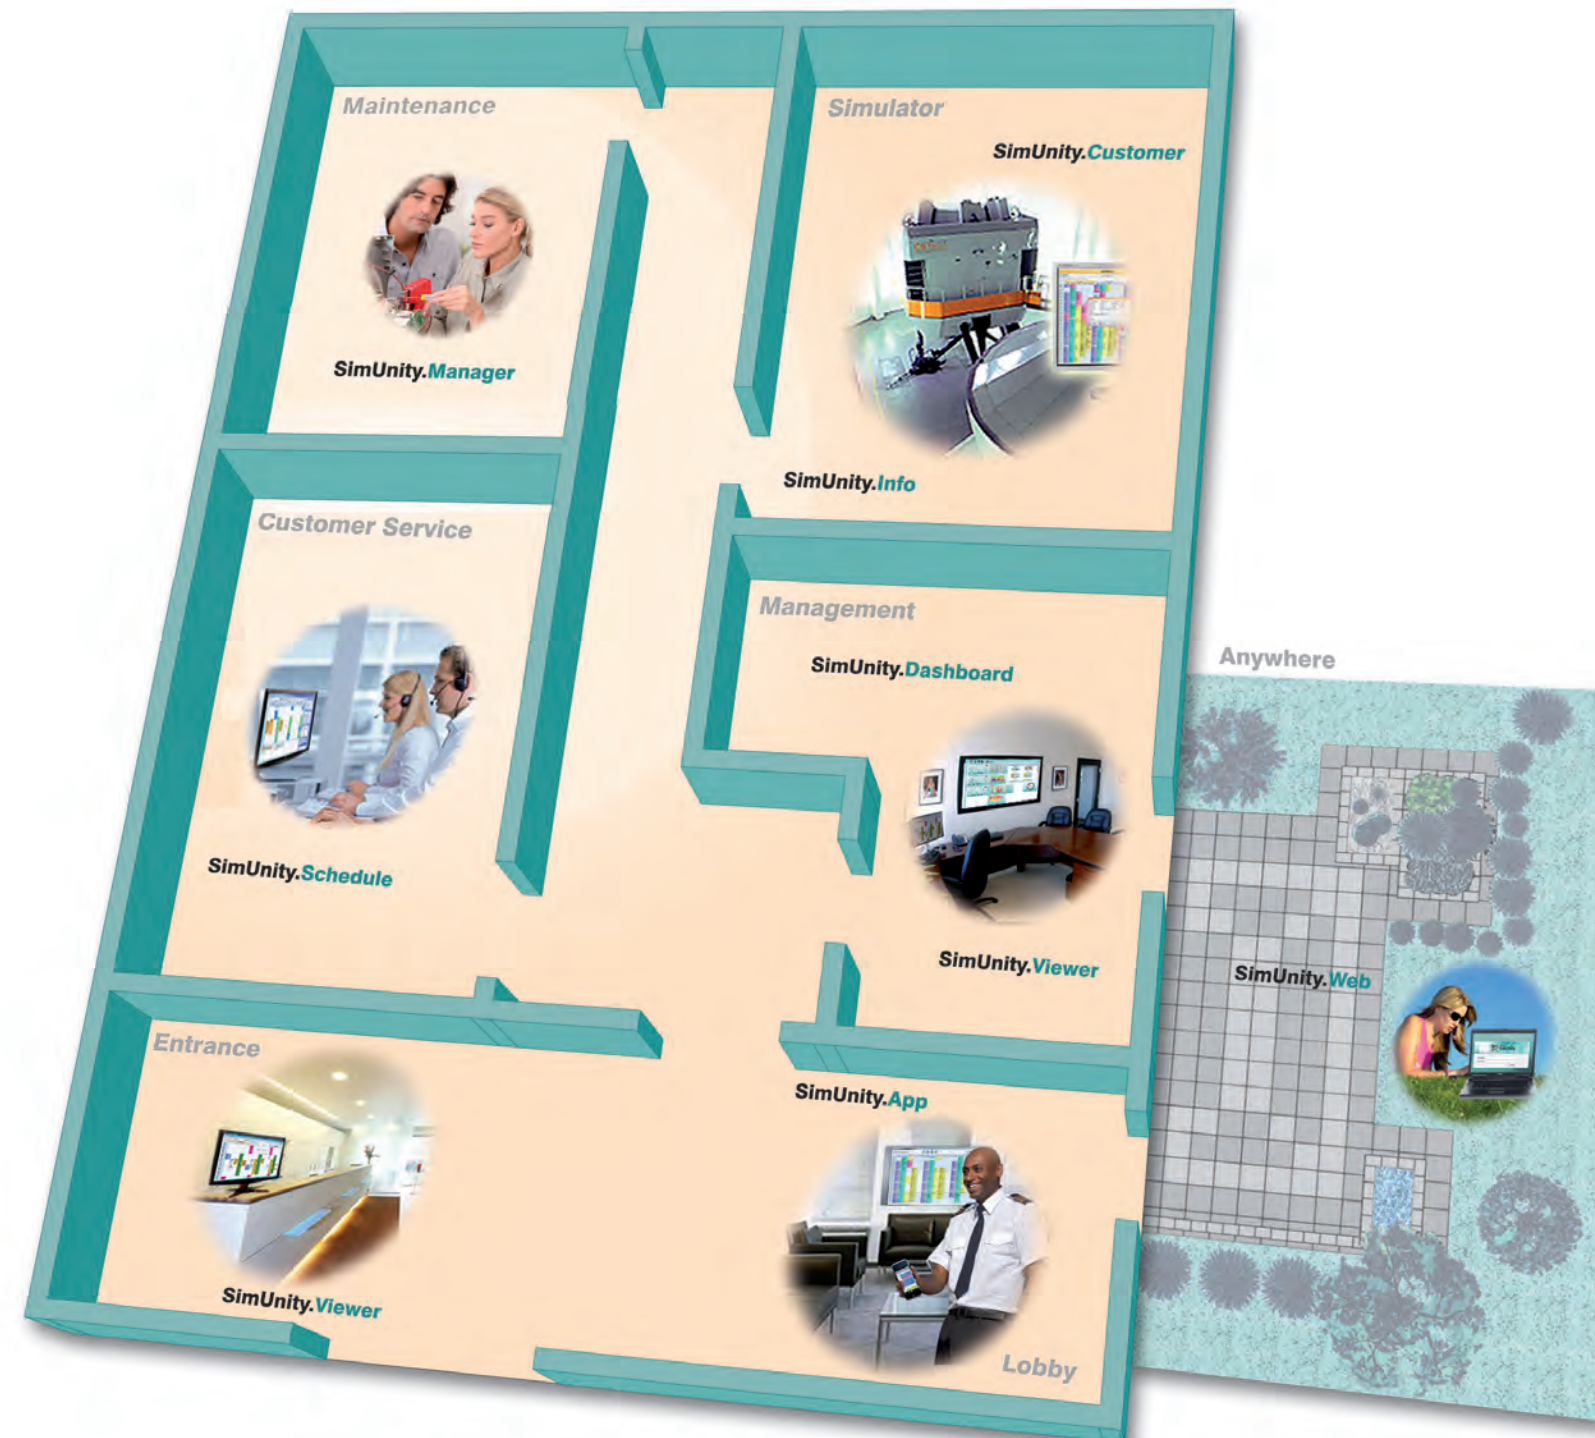

SimUnity® Suite

SimUnity is the modular software solution for your flight training center:

Everything you need in one modular and customizable software suite.
We know your business!

Your Flight Training Center

Modules

-  **SimUnity.Server**
The SimUnity core application server for central services and database storage powered by the reliable MS SQL-Server.
-  **SimUnity.Manager**
The main application for your maintenance crew to perform a good and quick job. From task tracking to spare part management – all relevant duties will be done by SimUnity.Manager.
-  **SimUnity.Schedule**
The integrated resource scheduling tool. Book or modify sessions, manage your customers and trainees – simply everything you need to achieve the optimal utilization of your resources.
-  **SimUnity.Dashboard**
The One-Stop-Information tool for the quick status overview. All relevant information in one user customized screen including trends and reports.
-  **SimUnity.Customer**
Keep in touch with your customers. Show relevant information for the upcoming session and get detailed feedback. Your quality manager will love this tool and the gathered information.
-  **SimUnity.Web**
Provide your customers an easy way to access their current training schedule and send session requests via internet.
-  **SimUnity.Viewer**
Quick and detailed multi resource scheduling overview at your entrance and workplaces.
-  **SimUnity.Info**
Quick booking overview with „IN-FLIGHT“ status, placed at the entrance of your resources.
-  **SimUnity.App**
All important information on your smartphone – everywhere up to date! Check your assigned tasks, pending issues and view the resource scheduling and utilization.
-  **SimUnity.Connector**
Already a scheduling system in use? No problem – SimUnity.Connector integrates your external scheduling system and provides all advantages of SimUnity.
-  **SimUnity.Admin**
Customize SimUnity to your needs and manage roles and access levels for users and groups.

About Skysoft and SimUnity

Skysoft was founded by its CEO Peer Meier in 1989. Mr. Meier studied at the technical University of Berlin and finished his degree in electro techniques in conjunction with air and space technology. Prior to founding Skysoft, Mr. Meier worked at the Center for Flight Simulation Berlin (ZFB) and setup the first A340 FSTD worldwide.

SimUnity results of the close partnership between Skysoft and Lufthansa Flight Training CST GmbH (LFT CST). Skysoft developed a tailored software solution – SimUnity – for LFT CST to meet all the needs of a flight training center.

Till now – LFT CST is our major development partner for SimUnity.
